

IN THE CLAIMS

Please amend the claims as follows:

Claim 1-53 (Canceled):

Claim 54 (Previously Presented): A test kit for visualizing skin lines and skin wrinkles, comprising:

- (i) a transparent substrate having an adhesive surface, wherein the adhesive is capable of making an image of skin lines and wrinkles after removal of the substrate from the skin;
- (ii) a visualizing substrate having a darkened area which is capable of receiving the substrate after removal from the skin; and
- (iii) a plurality of reference images adapted to provide a comparison with the image formed on the adhesive surface of the substrate.

Claim 55 (Previously Presented): The kit of claim 54, wherein the adhesive surface responds to contact with the skin.

Claim 56 (Previously Presented): The kit of claim 54, wherein the adhesive is a solid.

Claim 57 (Currently Amended): The kit of claim 54, ~~which~~ wherein the reference images correspond to various degrees of aging of the skin.

Claim 58 (Previously Presented): A method for evaluating the efficacy of a skin treatment product, comprising:

applying a first transparent substrate having an adhesive surface to the skin, wherein the adhesive makes an image of skin lines and wrinkles after removal of the first transparent substrate from the skin;

removing the transparent substrate from the skin and placing the transparent substrate on a visualizing substrate having a darkened area;

applying a skin treatment product to the skin;

applying a second transparent substrate having an adhesive surface to the skin, wherein the adhesive makes an image of skin lines and wrinkles after removal of the second transparent substrate from the skin;

removing the transparent substrate from the skin and placing the second transparent substrate on a visualizing substrate having a darkened area; and

comparing the image from the first transparent substrate and the image from the second transparent substrate.

Claim 59 (Previously Presented): The method of claim 58, further comprising treating the skin with a cosmetic product prior to applying the first transparent substrate.

Claim 60 (Previously Presented): The method of claim 58, wherein the skin treatment product is an anti-wrinkle agent.

Claim 61 (Previously Presented): The method of claim 58, wherein the adhesive is a solid.

Claim 62 (Previously Presented): The method of claim 58, wherein the substrates and the skin treatment product are packaged as a kit.

Claim 63 (Previously Presented): The method of claim 62, wherein the kit further comprises reference images which correspond to various degrees of aging of the skin.

Claim 64 (Previously Presented): The method of claim 58, wherein the substrates are applied to at least one area selected from the crow's foot region, the forehead, and the corner of the mouth.
